Ceramic Powder Processing Science
INTRODUCTION

A general method for the preparation of a glassy, glass-ceramic, or ceramic material is required for the use of metalloenthalpic glasses, glasses, and glass-ceramics. The most important is the use of metalloenthalpic glasses, glasses, and glass-ceramics, as they are the most suitable for the preparation of a glassy, glass-ceramic, or ceramic material.

METALLOENTHALPIC GLASSES

Metalloenthalpic glasses are glasses, glasses, and glass-ceramics that have been prepared from the re-
